

Muhammad Ibrahim

Junior MERN Stack Developer | Backend Developer

Karachi, Pakistan | 0330-2826165 | ibrahim.engdev@gmail.com | [GitHub: muhammadibrahimdev](#) |

[LinkedIn: Muhammad Ibrahim](#)

PROFESSIONAL SUMMARY

Software Engineering student and MERN Stack Developer with hands-on internship experience building full-stack web and mobile applications using React, Node.js, Express.js, and MongoDB. Skilled in REST API integration, backend development, and cross-platform mobile development with React Native. Currently strengthening skills in system design, data structures, and algorithms, with a strong interest in building scalable backend systems.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, React Native (Expo)

Backend: Node.js, Express.js, REST API Design, GraphQL

Databases: MongoDB, PostgreSQL

Tools & DevOps: Git, GitHub, Docker, CI/CD Pipelines

Concepts: Backend Architecture, Problem Solving

Currently Learning: System Design, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

MERN Stack & React Native Developer — Internship

Dec 2025 – May 2026 (6 months)

- Developed and maintained full-stack web and mobile applications using the MERN stack and React Native (Expo).
- Built and integrated REST API endpoints with Node.js and Express.js to power backend services for a multi-theme e-commerce store builder platform.
- Worked with MongoDB and PostgreSQL to support dynamic storefront content and data persistence, and collaborated using Git and GitHub for version control.

Backend Developer — Saylani Mass IT Program (SMIT) Bootcamp 3

Sep 2025 – Nov 2025 (3 months)

- Built a web application for Saylani Welfare's headquarters to digitize loan and zakat request processing, replacing manual, handwritten receipts.
- Developed request submission, verification, and confirmation workflows to track the status of loan and zakat applications end-to-end.
- Collaborated with a bootcamp team to design and implement backend logic for request tracking and record management.

PROJECTS

ClassPilot — School Management SaaS Platform

- Built a multi-role SaaS platform (Super Admin, School Admin, Teacher, Parent) with role-based access control and JWT authentication, including refresh tokens and bcrypt password hashing.
- Designed a multi-tenant architecture where each school operates as an isolated entity managed by its own admin.
- Implemented real-time notifications with Socket.io for attendance alerts and fee reminders, and integrated Stripe for Basic/Pro subscription billing with automatic plan upgrades.

Tech Stack: React, Redux Toolkit, Node.js, Express, MongoDB, Tailwind CSS, JWT, Socket.io

Store Builder Platform — [sellkar.pk](#)

- Built a multi-theme store builder web application allowing users to browse, preview, and deploy their own online stores.
- Developed and maintained 20+ responsive storefront themes within a single repository, and integrated REST APIs to load live store data upon deployment.

Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs

EDUCATION

Bachelor of Science in Software Engineering (BSSE)

2024 – 2028

Sindh Madressatul Islam University (SMIU)

Modern Web and App Development Course

2024 – 2025

Saylani Mass IT Program (SMIT)
